

University / Academy: Beni Suef

College / Institute: Arts

Department of Information Science

Course Description

1. Course data	
Code:	Course Name: Computer Applications (Networks)
Specialization :	Number of units: ٣ practical ٢ my work
2. Course Objective:	<ul style="list-style-type: none">1. Introduce students to the basic concepts of networks.2. Introducing students to different network types and designs.3. Introduce students to information networks and simple basic construction.4. Introduce students to networking techniques of communication devices, devices and protocols.5. Introducing students to network applications in different libraries and information centers.6. Provide students with basic practical skills in building an information network in its simple form.7. Provide students with the skill of benefiting from networking applications in the field of specialization (using digital library)
3 - The target of teaching the course:	

Information and concepts	The student can create a general idea of the information networks in terms of different types, techniques, how to design, build, operate and maintain.
