

# **Specialized Libraries in the Departments of Beni-Suef Governorate: A Study of Their Status Quo and Future Plans.**

Supervised by:

Prof. Dr. Shabaan Abdel Aziz Khalifa.

Associaed with:

Dr. Vidan Omar Mosalam

Degree: M. A.

The thesis aims pointing out the capabilities of the Specialized Libraries in Beni-Suef Governorate to support its departments and fulfil their needs of the information required.

The thesis revealed that the Specialized Libraries in the Departments of Beni-Suef Governorate can not assume their desired role as they suffer from shortage in manpower, budget. Space, fururniture, equipment and technical presentation of their possessions. Beside, such possessions do not cope with the target users' needs and the services they offer are very poor. The thesis also revealed that there is no cooperation between the Specialized Libraries in Beni-Suef Governorate although there are basic factors for such cooperation such as geographic near locations and their interest in similar topics. Through the thesis, the researcher proposed solutions and suggestions for overcoming the obstacles from which the libraries in Beni-Suef Governorate suffer so that they could fulfill the informational of the departments.

# **Abnormal Behavior of Users in Libraries and Methods of Administrative Reform: Field Study of Theft, Damage and Riot in Egyptian Libraries**

**Prepared by:**

**Fayza Desoky Ahmad Hassan .**

**Supervised by:**

**Prof. Dr. Mohammed Galal Sayed** ( Professor of Libraries and Information Science . Faculty of Arts, Beni-Suef - Cairo University ) .

**Prof. Dr. Tareef Shawqi Mohammed** ( Professor of Psychology . Faculty of Arts, Beni-Suef - Cairo University ) .

**Assistant Prof. Dr. Hani Mohey El-Din Atiyyah** (Assistant Professor of Libraries and Information Science . Faculty of Arts Beni-Suef - Cairo University ) .

**Degree: Ph. D.**

This study aims at identifying the types and causes of abnormal behavior of users in libraries in general and Egyptian libraries in particular . Shedding lights on abnormal behavior in legislations of libraries in general and Egyptian legislations of libraries in particular . How Egyptian librarians deal with these practices and the ways of qualifying them to deal with the different behavior of users in the future by means of study and training programs . Identifying the attitudes of users toward abnormal behavior in Egyptian libraries. Suggesting mechanisms to deal with abnormal behavior in libraries and ways of managing it through legislative and administrative regulations .

The study shows that Egyptian libraries suffer from damage, theft, and riot which are difficult to trace efficiently due to the inavailability of the necessary tools and records, the study points out the variety of the causes of these abnormal practices as there are causes concerned with the library and others concerned with the users . It also points out the absence of efficient techniques to manage these practices in those libraries as well as the absence of the necessary items in the law that ban abnormal behavior in Egyptian libraries . In her recommendations, the researcher stresses the necessity of conducting more researches and studies to identify abnormal behaviors in Egyptian libraries in a more comprehensive way, making records to trace them. She stresses the availability of the necessary techniques to manage these practices taking into considerations the security factors in the building, offering good services, qualifying the staff, users' awareness and putting the regulations and legislations which ban abnormal behavior in Egyptian libraries .

## **Information: Policies and Ethics**

Dr. Fayza Desoky Ahmad Hassan

Assistant professor of information

Department of Information Sciences, Faculty of Arts, University of Beni  
Suef

Beni Suef, Egypt

[fayzadesokky@yahoo.com](mailto:fayzadesokky@yahoo.com)

Chapter Discusses the informatics policy definition, and the importance of information policy, and objectives of informatics policy, and the areas covered by the informatics policy, the requirements of informatics policy development, and the types of information policies, and models of IT policies, and the impact of modern information in the information policies techniques. In addition to the definition of the ethics of information, and the statement of the difference between law and ethics, ethics and the importance of information, and the areas of the ethics of information, and discuss ethical issues in the field of information, and work to find solutions.

## **Internet search privacy**

Dr. Fayza Desoky Ahmad Hassan

Assistant professor of information

Department of Information Sciences, Faculty of Arts, University of Beni Suef

Beni Suef, Egypt

[fayzadesokky@yahoo.com](mailto:fayzadesokky@yahoo.com)

### Abstract:

The study aims to find out the extent to which search engines to users 'privacy, as well as the submission of proposals in which they can help protect users' privacy during their search on the Internet. Among the most important findings, that the search engines brings a tremendous amount of information about users, and that it is very easy for them to determine the identity of a particular user, if registered in, or bought something while he was on location. And that there is a lot of risk it may fall as a result of the collection of this information. The motors can be shared in the information it collects from users or about them with others, without the user's consent. The majority of the engines do not provide the user, his research could be deleted from the data servers. And these results can be summarized in that: the majority of search engines do not maintain the privacy of the search for the user; they do not give him the opportunity to identify the information that will be collected from him or about him, and they reveal this information to third parties without consent.

### key words:

Privacy, the search engines.
